

## ZAC KITS FACE MOUNT PLEATED MESH SYSTEMS FOR WINDOWS AND DOORS REDUCIBLE

Easy to install only  
with a small screw

10

**GTR**  
Construction Technologies

All the advantages and the features of the Zac insect screens, now available in the face mount version: not just an adaption of the existing ZAC inset mount system, a complete new system thought and designed for those markets where the face mount situation is a standard. No need of additional costly and ugly frames. No need of holes and screw in the side guides, the Zac face mount system is a pre-assembled screen that will make every installer happy. Just four screws, one in each corner of the window or door and the screen will be installed.

Again, an easy to assemble and easy to install insect screen system from Gtr.

With the Central Pack option, zigzac is really a perfect solution for sliding door systems.
